# Cartagena de Indias, as Herrera drew it

Colombia, 18th century: its wall tips (bastions) land typically about 16 m from where they stand today

## In red, today

- Baluartes hoy

How it was made: all in RustGIS web (web.rustgis.app), with four scripts.
1 · Data: Herrera's plan from Wikimedia Commons, as a picture with no coordinates, and the tips of 9 bastions and the San Felipe Castle taken from OpenStreetMap.
2 · View: Control Point Fit and Georeference with those 10 points (affine transform). The plan's north ends up at the lower left, as Herrera drew it.
3–4 · Layouts in Spanish and English, by script: github.com/jgregoriorincon/30DayMapChallenge-2026

Data: Plano de Cartagena de las Indias, Juan de Herrera y Sotomayor (18th century) — Bibliothèque nationale de France, Gallica (public domain), via Wikimedia Commons.
Bastions and basemap: © OpenStreetMap contributors (ODbL), accessed 2026-11-05.
