# On Exactitude in a Block

Everything Overture knows about the block of the Palace of the Inquisition, in Cartagena's historic centre

## THE MAP THE SIZE OF THE EMPIRE

*«…levantaron un Mapa del Imperio, que tenía el tamaño del Imperio y coincidía puntualmente con él.»*

Jorge Luis Borges, «Del rigor en la ciencia», 1946:
"they drew up a Map of the Empire that was the size of the Empire and matched it exactly"

## THE 45 PLACES, BY GROUP

- Eating and drinking · 14
- Shopping · 13
- Institutions · 8
- Sleeping · 5
- Services and others · 5
- Address · 21
- Building · 28
- Block

## THE INVENTORY, AFTER BORGES

According to Overture, the 45 places in the block are divided into (a) restaurants, 9; (b) clothing and jewellery shops, 8; (c) hotels, 4; (d) government offices, among them an "Instituto geográfico Agustín Codaci", 3; (e) ice cream, yoghurt and ice lolly shops, 3; (f) museums that are the same museum, 2; (g) banks and lenders, 2; (h) gifts and antiques, 2; (i) a bar, Bourbon St., and an events service, Borboun St.; (j) a shopping centre called Colombian Coffee; (k) a library listed as a community service; (l) a lodging Overture is 12% sure of; (m) a restaurant called Cartagena; (n) seven more, one of each; (ñ) those still open: unknown, none says whether it operates.
Of its 28 buildings, one has a name ("Palacio de la Inquisición") and another, a number of floors: two.

Data: Overture Maps Foundation, release 2026-10-21.0: buildings (© OpenStreetMap contributors and Overture, ODbL), places (CDLA Permissive 2.0) and addresses (Overture and its sources), as GeoParquet read in place. Imagery: Esri World Imagery (Esri, Maxar, Earthstar Geographics). Block outline: drawn from Overture's street centre lines. Counts: DuckDB on the same files. Quote: J. L. Borges, "Del rigor en la ciencia" (1946), our translation.
How it was made: all in RustGIS web (web.rustgis.app): the three Overture GeoParquet files, added by hand from their address (Home › Add › From URL) and read by range, and four scripts: filter by id, colour and labels by expression, and layouts.
Scripts: github.com/jgregoriorincon/30DayMapChallenge-2026
