30DAYMAPCHALLENGE · DAY 12 · POWER · COLOMBIA

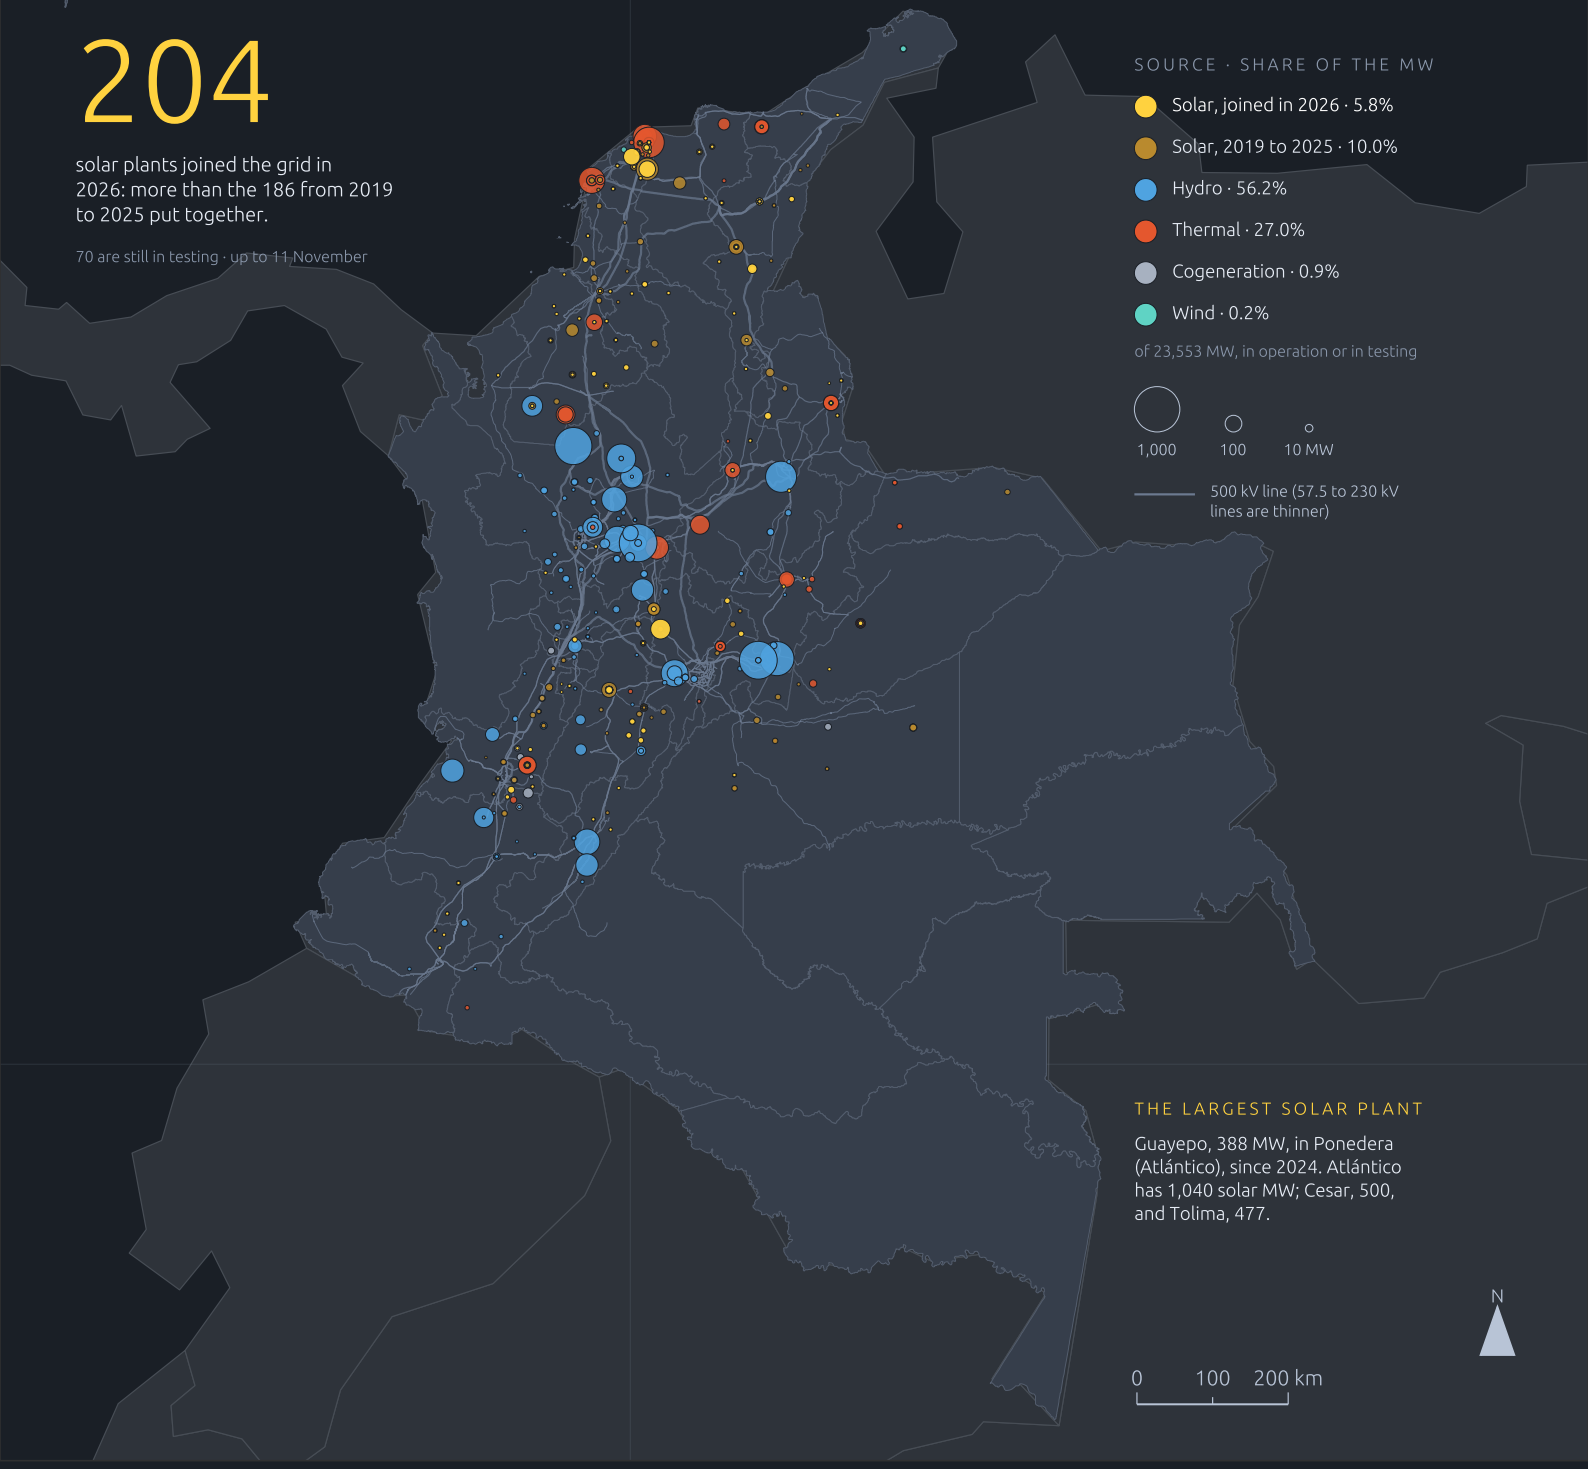

The sun came late, and all at once

Power plants on the national grid, in operation or in testing, and the transmission network

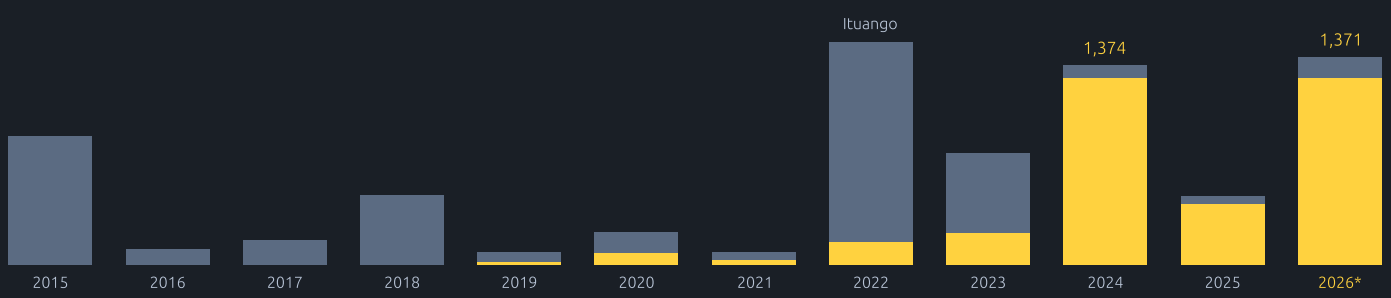

204

solar plants joined the grid in 2026: more than the 186 from 2019 to 2025 put together.

70 are still in testing · up to 11 November

MW ADDED EACH YEAR

By year of commercial operation, for plants still on the grid. * 2026, up to 11 November.

Data: UPME (Colombia's Mining and Energy Planning Unit) Geoportal, electricity layers: power plants (with XM data) and built transmission lines, accessed 2026-11-11; UPME declares no licence and presents them as indicative and approximate. Departments: DANE, MGN 2025. Basemap: RustGIS Midnight. How it was made: all in RustGIS web (web.rustgis.app), with four scripts: PBF data, Unique Values, size by expression (square root of the MW) and layouts. Scripts: github.com/jgregoriorincon/30DayMapChallenge-2026
